esela Virtual Conference

An agenda of inter-connected conversations

The spaced agenda of the Virtual Conference takes place from 8-31 March 2021.

The conference will draw connections between our 2021 themes, hearing from policy advisors, impact investors, academics, and politicians, as well as lawyers from esela's international network.

Our vision is for a sustainable and inclusive economy that creates **positive impact**. Through the conference, our aim is to promote a better understanding of the law in areas that are most deeply connected to this vision.
